SOFTWARE

PYTHON IDE

The screenshot displays the Python IDLE Shell 3.9.9 environment. The main window shows the command prompt with the Python version and system information. A secondary window, titled 'tts.py - C:\Users\sibis\OneDrive\Desktop\tts-main\tts-main\tts-main\tts.py (3.9.9)', contains the following Python code:

```
File Edit Format Run Options Window Help
from ibm_watson import TextToSpeechV1
from ibm_cloud_sdk_core.authenticators import IAMAuthenticator

authenticator = IAMAuthenticator('1SuMpB1oLx9PuvKX-wmvMh3E3lQbUKcXEErW1eXdmY9j')
text_to_speech = TextToSpeechV1(
    authenticator=authenticator
)

text_to_speech.set_service_url('https://api.au-syd.text-to-speech.watson.cloud.i

with open('hello_world.wav', 'wb') as audio_file:
    audio_file.write(
        text_to_speech.synthesize(
            'Take Crocin Now',
            voice='en-US AllisonV3Voice',
            accept='audio/wav'
        ).get_result().content
    )
```

The Windows taskbar at the bottom shows the search bar, task view button, and several application icons. The system tray on the right indicates 'Rain off and on', network status, and the date '04-11-2022'.
